Charcoal (AW 19)  
Black (AW 21)

**Warranty:**

25 Year on the frame  
10 Years on the foam  
10 Years on upholstery

Greetings from Comfor Tek Seating Inc!

Thank you for taking time to query information regarding seating options for your church project. We appreciate the mass amounts of information that one must sift through in bringing a project through to completion, therefore your willingness to examine the merits and features of the Summit Series for a possible chair of choice for your current project is appreciated.

Undoubtedly, you will be reviewing many different seating options and solutions. Permit me to highlight three (3) choice options from our Summit Series:

### Pew Seating – Seamless Seating

Chairs of this style are usually more formal in design. Manufactured as an alternative to the conventional wooden church pew configuration, these chairs accommodate a variety of add on features such as book racks, card pockets, side moldings, ganging connectors etc. Each chair features a more traditional foam padded seat and back and can be covered in a myriad of colored fabrics.

Primary features include high-density foam padding, upholstered finish, steel frame, ganging – inter locking connection, attachable amenities.

The stack-ability feature of these chairs permits multiple settings for the sanctuary area. However, the physical dimensions of the frame (20-22" wide) and the thickness of the high-density foam padding, certainly limits the frequency by which one would want to perform this task. A workable stack would consist of 6-10 chairs. The chair can be fitted with a stackable wire bookrack which does not impede the stack-ability of the chair

### SS 661 Pew Seating – Individual Seating

The SS 661 provides a more individual appearance, and is used in sanctuaries, fellowship halls and classrooms. Designed to accommodate even large guests, the chair measures 20" in width and has a full 3" foam cushion seat. Additional features include card pockets and book pouch.

### SS 771 - Banquet Seating

As the name implies these chairs are designed to fit around banquet tables. These chairs are narrower in design enabling greater numbers of chairs to be placed around each table. These chairs are manufactured with 2" foam padding and covered with a durable upholstery fabric. These chairs can be stacked 8-10 high. Features such as the "H" bar and stacking bars provide superior durability and longevity.

Primary features include 2" high-density foam seat padding, stack-ability and narrower (18 inches) design, thereby accommodating up to 10 chairs around a 60 inch round table.

## SS 791 - High Density Stacking

Chairs of this style have less bulk and are usually seen as being less formal in design. Targeted for applications where comfort combined with stack-ability are required, these chairs can accommodate multiple needs and applications. This design includes a 7/16" steel frame, a molded seat and back.

Comfort, stack-ability, light weight/unit and frame stability are its primary features. The SUMMIT stacks 35 units high on its own dolly, to an overall height of 74". This enables a stack of chairs to be transported through any standard door opening. Additional features include a ganging connector for use in row seating.

**Terms:** Terms for all orders are 40% down with the order, with the balance due upon notification of shipping. Please advise if this creates any difficulties for your organization.

**Samples:** At your request, we will be pleased to forward a sample chair for your continued review and assessment. Sample chairs are shipped directly to your location via bus/ground courier service.

- Recognizing the ever increasing expense of delivery services, CTS is pleased to cost share the sample/freight costs with you. While CTS will cover the cost of the chair, we ask church/organizations to cover a portion of the courier freight costs (\$35 CDN). Visa/MasterCard payments are accepted.
- In recognition of your support in this area, CTS will issue a credit for \$70 which will be applied against the total purchase of your order.

**Shipping:** All products are shipped from our manufacturing/distribution facility plant located in Lethbridge, Alberta. Unless otherwise requested, delivery charges, as quoted, reflect tailgate delivery services only (please acknowledge, the receiving organization needs to facilitate all unloading efforts). Should your organization have resources to arrange its own shipping we will be pleased to work with you in this regard.

**Warranty:** Our **Summit Series** is covered by the following warranty:

CHAIR STYLE	FRAME	FOAM CUSHIONING	UPHOLSTERY
SS 701 Pew Style (Seamless Seating)	25	10	10
SS 661 Pew Style (Individual Seating)	25	10	10
